PROLUME

XML MICRO SERIES

Sleek, stylish and tiny... the XML delivers outstanding lumen output that, when combined with the less than one-point-two (1.25) cubic inch fixture envelope, is nearly imperceptible in any application.

This decorative miniature luminaire is designed for recessed and low-profile applications. Constructed of a solid aluminum housing the XML provides durability and thermal management in an aesthetically pleasing form. Available with a variety of optics to achieve the desired beam sculpting, the XML can be easily mounted in ceilings, walls and millwork to achieve the specifiers desired effect. With a class two rating, the **XML** is

dimmable and can be joined in series or parallel from a single driver when multiple fixtures are required.

Offered in black, white, natural and chrome finishes standard and custom finishes optional, the XML can be recess mounted or surface mounted with an articulating yoke bracket. The XML once again proves the adage that good things really do come in small packages.

Features

- Made in America quality and craftsmanship
- Solid aluminum housing for optimum heat dissipation
- Ultra-low profile for shallow recessed applications
- Five standard CCTs and four colored LED options
- Configurable in either series or parallel to a single driver
- Recessed and articulating surface mounting options
- Custom finish options available

- All dimensions in INCHES

Dimming

The Micro Series of products is energized through a constant current power supply. There are two methods of for dimming the Micro Series which include a constant current driver with built in analog dimming or a constant voltage driver with PWM output. In either configuration, an external 0 – 10V_{DC} dimming controller is required to reduce illumination down to zero percent.
